## **DETAILED ACTION**

### **State of the Claims**

Applicants reply dated May 24, 2010 amends claims 9, 10, and 12 and cancels claims 1-8 and 11.

In view of the instant reply, claims 9, 10, and 12 are all the claims pending in the application.

### ***Allowable Subject Matter***

Claims 9, 10, and 12 are allowed.

The following is an examiner's statement of reasons for allowance:

As indicated on page 6 of the Official Action dated February 24, 2010, the prior art of record does not teach nor reasonably suggest employing a measured value of the  $\text{He}^3/\text{He}^4$  ratio as a means to exercise control over the glass manufacturing process.

The reference to Takagi (WO 03/066539) teaches bubbling helium gas through a gas melt in order to homogenize said melt. Although Applicants recited helium isotope ratio may arguably be derived through routine experimentation, the instant reference is silent with respect to the recited step of evaluating the degree of homogeneity by measuring the helium isotope ratio and setting or changing a production condition for the glass article on the basis of the measured volume ratio.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1791

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
